Lichtlauf

SirSimon

product description

Design Christoph Matthias and Veit Redl 2015

Copper wire. Colour-coated.
 Powerful, soft light downwards.

Each luminaire is individually shaped, unique. Height adjustment on the wire rope.

Light source: LED approx. 12 W, light colour warm white

Dimensions: approx.

Each lamp is unique.
Due to the handcrafted manufacturing process, irregularities may occur in the leaf-finished surface.
These are no product defects and therefore no cause for complaint.

technical data

230 V ∿ 50 Hz
1 x max. 12 W LED, max. 350 mA

Type:
Indoor light IP20

This luminaire contains built-in LED lamps.
Energy classes: A - A++
The lamp can only be replaced by the manufacturer.

safety note

Follow always the hints of this instruction for a safe assembly and use of these lights.
Keep the assembly instruction for further questions.

The assembly and the electric supply must be done by an electric professional. Local installation regulations have to be respected.

The manufacturer accepts no liability for any damage due to improper use of the luminaire.

Attention! Before working on the luminaire disconnect it from the mains.
Also for cleaning, maintance and lamp change.

Luminares are only allowed to be used for the specified purpose. Interior lights may not be used in outside area. Luminares may not be covered.
They may not be connected to power supply still they are packaged.
Lights with elctronic control gears (ECG) have to be operated with original ECGs.

The lamp change must be done by an competent professional.

Use only lamps with same type of construction, performance and voltage.

In case of damages, in particular of cable and socket, the luminare have to be shut off immediately. In case of damage on the mains cable it has to be changed by the Lichtlauf GmbH.
For malfunction call autorized personnel for troubleshooting.
Never repair it by yourself.

Through improper repair work may arise risk for the user.

Elements of plug and connection shall be free from traction and torque.

care instructions

Disconnect the device from the power supply grid before cleaning.

The care of lighting is limited to the surfaces.
Make sure that no liquid can reach the connection area or electrical components.

Important:
Please don't use spiritus or alcohol containing products.
As well as no abrasives or abrasive containig detergents.

Only use a damp cloth or duster to clean the lamp.

special notes

Keep plastic bags and small components away from children to avoid risks of suffocation or swallowing!

Do not look directly into the light source!
(risk of glare or eye damage)

20 mm

10 mm

Assembly of the light cable

preparation

Before you start mounting and connecting the luminaire, make sure that the cable is voltage-free.
It is best to remove the fuse.

1. Define the suspension height of the luminaire. Cut the luminaire cable to length with an addition of approx. 10 cm.

2. Assemble the luminaire cables according to the drawing.

Remove approximately 20 mm of the outer sheath. Please be careful! The coaxial braid must not be damaged.
Then twist the coaxial braid into a conductor (-).
Provide this with a piece of shrink tubing. Then a larger one over the place where the two conductors share.
Insulate both conductors by approx. 10 mm.

Finally squeeze the conductors with one ferrule each.

Zur Befestigung an der Unterputzdose

[A]

Zur Befestigung an der Decke

[B]

[C]

Mounting on flush-mounted box

Pass the secondary line of the control gear through the opening [A].
Connect the conductor (L) and neutral conductor (N) (marked on the luster terminal) of the control gear to the corresponding conductor of the ceiling outlet in the luster terminal in the flush-mounted box.
Fasten the canopy to the flush-mounted box using suitable screws.
You can also fix the box to the ceiling if required. Use suitable screws for your ceiling.

Connect (+) and (–) of the secondary line of the control gear with (+) red and (–) black of the luminaire cable to the connection terminals.

Close the canopy with the three screws provided.

Attach the cover plate [B] to the canopy by screwing in the cable securing device [C].

Secure the lamp cable against
Slide out of the cable safety catch by screwing in the grub.

[C]

Mounting without flush-mounted box

Pass the ceiling outlet through the opening [A] in the canopy box.
Fasten it with three screws suitable for your ceiling.

Connect the conductor (L) and neutral conductor (N) (marked on the luster terminal) of the control gear to the corresponding conductor of the ceiling outlet.

Connect (+) and (–) of the secondary line of the control gear with (+) red and (–) black of the luminaire cable to the connection terminals.

Close the canopy with the three screws provided.

Attach the cover plate [B] to the canopy by screwing in the cable securing device [C].

Secure the lamp cable against slipping out on the cable securing device by screwing in the grub.

[E]

Pass the wire rope through the wire rope
holder [E].

Set the desired suspension height.

Excess wire rope can be cut off.
Leave a rest of 5 cm.
